

Hello Balbir Kaur Bansal-

Thanks for sharing your requirement, here I have shared SOW in which I have mention about the requirement that I have understood.

Parking Requirement-

We required a Parking website for my parking space

- This website have login for Admin, & any one can login as user to check their previous transactions.
- Admin can create a sub-admin, who will have only access of specified fields i.e. their upcoming guests, billing & release any space, while customer picked up his/her vehicles.
- User can book from front end itself, while he was entering his details for booking, it will automatically create his login and send an auto generated password on customer email id.
- Customer can intentionally sign-up also, and after sign up he need to verify his/her email id by clicking on link sent to his/her email.
- After Login, if customer is booking space for more than 24 hours i.e. 1 day, he/she can make partial payment also, which should not be less than 1 day cost.
- While booking it should ask Parking date with arrival time and in same way Pickup date & time.
- If this time will increase by 3 hours, it should count only 1 day & charge accordingly- While booking space, they customer can also get option to book extra services i.e. Car Wash etc. (These services should be dynamic and admin can create from back end).
- Admin can manage the available parking space, Per day booking amount calendar wise, Extra services & it's cost also.
- Admin can generate the discount coupon and if any customer who got these coupon use in to site, he/she will get discount accordingly. These discount coupons can be in percentage (%age) or in exact amount also.
- These coupons can enter from both side i.e. Admin, Sub Admin or by user to redeem.
- Admin can download all the earlier guest details by one single click for easy understanding of Account. Admin can also able to download their expected guests.
- Parking Booking Calendar automatic get open for at least 365 days in advance, i.e. If, I am a customer and interested to book parking space, I can book space for maximum of next one year date (Till next year 8th of Jan-2020), and this

This website will be completed in 30 working days.

Please agree with the pricing for performing the task will be 1500\$ USD and There will be an upfront payment of 750\$ USD and the code will be released once you release the payment. Waiting for your positive response from your end.

Thanks You

Harsh Tyagi
